## Individual reflection - Week 3

### What do I want to learn or understand better?

Learning objective - Angular

A: I still feel like I have no knowledge in how angular works.

B: Since we have started working on our project this week, I'd like to try and understand more about how the components are being used.

C: Reading about specific angular components used in the project to get a sense of how it is being used in our project.

### How can I help someone else, or the entire team, to learn something new?

By listening and responding to other people's ideas. Be open to new stuff and also contributing my point of view of the project.

### What is my contribution towards the team's use of Scrum?

For this week I have started to actually work with the project with another project member. We have managed to build a navigation bar, and with this we have moved each task to different phases when it was finished.

### What is my contribution towards the team's deliveries?

I keep track of the tasks and manage to deliver what has been asked of the task/tasks. I also communicate the progress so that everyone is included in the decisions that has been made when progressing a task.
